

**Effective June 10, 2019, the Walker River is under a flood warning.**

**Until further notice,  
flood mitigation water  
will be available for all users.**

**Note:** This water will not be held against your duty and users who can benefit from the extra water are urged to use it.

***\*\*\* Please do not order the flood mitigation water if the intent is to have it flow back into the drains; the drains already have a significant amount of water in them and filling them with flood mitigation water will not help with drainage efforts \*\*\****
